Victoria Hills

I am an active 8th semester student of Telecommunication Engineering, Telkom University with experience in IoT development and fiber optic technology. Interested in sustainable technology and microcontroller-based solutions

Education Level

Telkom University - Bandung

Sep 2021 - Aug 2025 (Expected)

Bachelor of Telecommunication Engineering is a study program that studies engineering in the field of telecommunications. The scope of engineering includes aspects related to technology, protocols, services, design and broadband information delivery techniques., 3.02/4.00

Work Experiences

KAI (kereta Api Indonesia) - Bandung

Jul 2024 - Aug 2024

internship

Balai Yasa Kiaracondong KAI (kereta Api Indonesia/Indonesian Railways) is a KAI workshop that is specifically used for bridge repairs, including the procurement of spare parts for active railway bridges, repairs to bridge frames, construction of new bridges, and routine maintenance.

- Designing WLSE (Wesel Terlayat Setempat Elektrik) is done by adjusting the needs of the switch control system locally. After the design is complete, the current-carrying cable is made and the cable is installed to the WLSE control panel to ensure optimal connectivity and power distribution. The next step is to conduct a thorough check of the system to ensure that the WLSE is functioning properly and can operate the switch electrically without any problems.

Organisational Experience

KMK (Catholic Student Family)

Jan 2024 - Nov 2024

Head of Logistics Division

The Catholic Student Family (KMK) is a student organization that functions as a forum for togetherness, faith development, and service for Catholic students.

- I am responsible for all room loans at Telkom. This responsibility includes managing the room loan schedule to avoid conflicts, ensuring the suitability of the room before and after use.
- I am responsible for all loans of goods needed to support various activities. In terms of loaning goods, I ensure the availability of goods, process requests according to procedures, and monitor the condition of the goods before and after use,

HMTT (Telecommunication Engineering Student Association)

Jun 2023 - Mar 2024

Staff Public Relations LO (Liaison Officer)

HMTT (Telecommunication Engineering Student Association) is a student association at Telkom University that focuses on the Telecommunication Engineering study program.

- I am responsible for protecting and looking after the group of students who are undergoing initial cadre formation from the beginning to the end of the event.

HMTT (Telecommunication Engineering Student Association)

Feb 2023 - Mar 2023

Staff Funding Division

HMTT (Telecommunication Engineering Student Association) is a student association at Telkom University that focuses on the Telecommunication Engineering study program

- I looked for funds by selling food around campus so that the event could run with sufficient funds.

Skills, Achievements & Other Experience

- Soft Skills: Time Management, Effective Communication
- Hard Skills: Understanding Fiber Optics, Understanding Microsoft Office
